

Simple TensorBoard Exercise

1. Build a three layer fully connected neural network, train it to predict diabetes in the pima indians dataset: <https://www.kaggle.com/uciml/pima-indians-diabetes-database>
2. view the training process using TensorBoard
3. Save the:
 - a. Loss
 - b. Activations
 - c. graph
4. Repeat this for:
 1. Keras
 2. TensorFlow version 1
 3. TensorFlow version 2
